SUMMARY

Senior Full-Stack Software Engineer with 8+ years of production experience, specializing in frontend architecture. Deep expertise in micro-frontends, real-time UI systems, and AI-integrated interfaces. Proven in building products end-to-end in startup environments — from system design to frontend delivery.

WORK EXPERIENCE

Senior Full-Stack Software Engineer - Remote | Awkns | Taipei, Taiwan May 2023 - Mar 2026

- **High-Concurrency Ticketing System:** Built a real-time ticketing platform using Stripe + Firestore Transactions with SSE-based live inventory sync — reduced overselling errors to 0%.
- **Config-Driven Operations Console:** Built an internal dashboard with runtime feature flags and A/B testing controls, enabling non-engineers to manage regional rollouts without engineering support.
- **Multi-Game Integration Framework:** Designed a micro-frontend layer (Module Federation) standardizing vendor protocols and cutting third-party onboarding time by 15%.
- **Offline-First Redemption System:** Built an IndexedDB-backed reward system for large-scale live events — reduced transaction errors to 2% and increased engagement by 35%.
- **Multi-Tenant Loyalty & Booking SaaS:** Architected a white-label platform with multi-tenant isolation, Stripe Connect revenue sharing, and AI-powered retention — enabling independent tenant onboarding at scale.

Senior Full-Stack Software Engineer | ECloudyValley | Taipei, Taiwan Apr 2022 - Apr 2023

- **Cloud Billing Dashboard:** Led development of an RBAC-driven AWS billing platform with async report generation — cut download latency by 60% and manual reporting effort by 70%.
- **Billing Data Pipeline:** Built a Python + NestJS ETL pipeline consolidating daily cloud usage across departments with fine-grained audit trails.
- **Shared Component Library:** Created cross-team UI library and standardized CI/CD workflows across 3+ business units.

Senior Frontend Engineer & Frontend Leader | Shinho (ArcheX, Bits x Bites) | Shanghai, China Dec 2015 - Mar 2022

- **IoT Manufacturing Dashboard:** Integrated IoT devices with real-time operational dashboards across multiple factory sites — reduced operational costs by 20%.
- **Micro-Frontend Migration:** Led adoption of Module Federation + Nx Monorepo, enabling independent deployment cycles across product lines and reducing cross-team release conflicts.
- **F&B Mobile Ordering System:** Built high-traffic QR-code ordering frontend integrated with POS via WebSockets — optimized for peak-hour stability.

Frontend Engineer | Yahoo | Taipei, Taiwan May 2010 - Nov 2015

- **AdTech Modernization:** Led Flash → HTML5/JS migration; shipped 4+ scalable ad products annually, improved CTR by 15%, and established reusable component standards across the team.
- **Ad Analytics Pipeline:** Built Python-based reporting system reducing latency by 80%, enabling live A/B testing and real-time performance optimization for global ad campaigns.

PROJECTS

Activo.quest | AI & Web3 Experimentation 2024 - Present

- Multilingual voice assistant with Llama3 + Grok API, real-time STT/TTS (Cartesia), multi-speaker recording.
- Web3 e-commerce with Ethereum/USDT/TON wallet integration and on-chain payment verification.

SKILLS

- **Languages & Frameworks:** React, Next.js, Vue, Nuxt, TypeScript, Tailwind CSS, Node.js, NestJS, Python
- **Architecture:** Micro-frontend, Multi-tenant SaaS, Event-driven, SSE/WebSockets, RBAC
- **Database:** PostgreSQL, MySQL, MongoDB, Firebase, Pinecone
- **Cloud & DevOps:** AWS Lambda, S3, RDS, EC2, CloudFront, Docker, CI/CD, Vercel
- **AI & Data:** RAG, Vercel AI SDK, LLM integration, Vector search
- **Certifications:** AWS Solutions Architect | AWS DevOps Engineer | PMP | ScrumMaster

EDUCATION

B.S. in Biology | Chinese Culture University, Taiwan
